

CHEMCO OVERWATCH

ACCU-SPENSE IMS (INVENTORY MANAGEMENT SYSTEM)

Accu-Spense IMS unit is a PLC-controlled system that records critical chemical usage data for Sanitation Program Control and Inventory Control purposes. The Accu-Spense IMS system uses level sensor and flow meters to track and record chemical usage and inventory in any chemical storage unit, from bulk chemical tanks to 55-gallon drums. The IMS system can be an add-on to other OverWatch systems or installed as a stand-alone operating system.

CAPABILITIES & BENEFITS

EASE OF OPERATION

The Accu-Spense IMS System is easy to use and navigate with detailed illustration and graphics. This is a cloud-based system and can be accessed onsite or remotely through any PC desktop or mobile device.

COST CONTROL

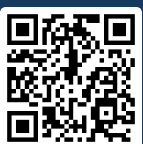

The Accu-Spense IMS System ensures the correct amount of chemical

MANAGEMENT OVERSIGHT
