

# ENGINEERING CAPABILITIES AND EQUIPMENT SOLUTIONS

## COMPREHENSIVE CHEMICAL, EQUIPMENT, TRAINING, AND SERVICE SOLUTIONS

Chemco Products Company offers innovative equipment solutions for sanitation, water, membrane, and wastewater treatment, supported by preventive maintenance programs and powered by OverWatch PLC-controlled systems. Bulk and mini-bulk tank installations, central foaming and sanitizing systems, polymer feed units, cooling tower and condenser cleanings, and much more are all delivered by trained professionals with extensive safety training.

### Cleaning & Sanitization Installations Capabilities

Bulk & Mini-Bulk Tank Installations

Central Foaming & Sanitizing Systems

CIP Dilution & Application Systems

Sink Wash & Sanitize Systems

Foot/Door Sanitizing Units

Chemical Allocation Units

Portable Foamers, Foggers & Sanitizer Spray Units

### Wastewater Installations Capabilities

Polymer Make-Down Systems

Coagulant & Polymer Feed Systems

pH Adjustment Feed Systems

### Water Treatment Installations Capabilities

Boiler Chemical Feed & Monitoring Systems

Cooling Tower / Condenser Disinfecting & Cleaning Services

Boiler Sample Cooler Units

Boiler Descale Services

Cooling Tower & Condenser Chemical Feed & Monitoring Systems

### CHEMCO OVERWATCH SOLUTIONS

OverWatch offers a comprehensive suite of PLC-controlled systems designed to enhance chemical management, data collection, and monitoring in Food and Beverage manufacturing facilities. OverWatch is highly effective for sustainability efforts while supporting consistent sanitation, wastewater, and water treatment programs.

From precise chemical allocation and blending to inventory tracking and system oversight, each OverWatch system is engineered for accuracy, safety, and efficiency. With intuitive bilingual HMs, real-time monitoring, and robust data reporting, OverWatch empowers operators to access critical data and optimize chemical usage.
